Self-employed · You choose every visit · We handle booking and payment

Why join HiCare?

Use your clinical skills in the community. Work around your own schedule

HiCare is a person-centred home healthcare service. HiCare GPs see patients at home and can refer them to a HiCare nurse for continuation of treatment, delivered by registered nurses working as self-employed practitioners.

We make it simple for nurses to receive home visit requests without the administration of running a private service independently.

WITH HICARE, YOU CAN:

Work at your convenience	Set your own availability around your shifts and commitments.
Work within your competence	Accept only the nursing treatments you are trained, competent and verified to deliver.
Set your own visit fee	You decide how much you charge for each type of home visit.
Choose every visit	Accept or decline each request - no fixed shifts or minimum commitment.
No payment administration	HiCare manages patient payments - no cash, invoicing or chasing payments.
Remain independent	You remain self-employed and decide when and how often you work.
Work where it suits you	Choose visits close to you or travel further when it is convenient.

Your availability. Your fee. Your choice of visits. HiCare takes care of the rest.

SIMPLE PROCESS

How it works

You receive home visit requests through HiCare, including referrals from HiCare GPs for continuation of treatment. You decide whether to accept or decline. You deliver nursing treatment in the patient's home.

1

SET PREFERENCES

Choose your availability, preferred areas and the nursing treatments you are competent to deliver.

→

2

RECEIVE REQUEST

Receive requests within your preferences and your verified scope of practice.

→

3

ACCEPT OR DECLINE

Review the visit details and choose whether to accept or decline.

→

4

HOME VISIT

Deliver nursing treatment in the patient's own home.

→

5

CLINICAL RECORD

Document the visit securely in the HiCare clinical record.

→

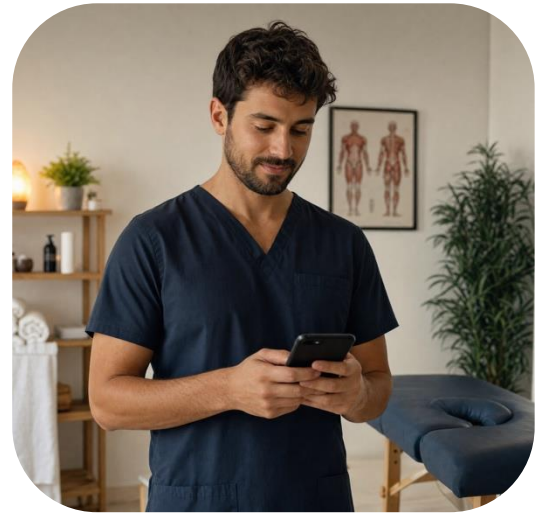

6

GET PAID

HiCare manages the patient payment. No invoicing or chasing payments.

Receive a request. Choose the visit. See the patient. HiCare supports the rest.

Important information: HiCare's digital systems are used for booking, scheduling, clinical records and administration only and not for remote clinical assessment, diagnosis, treatment or follow-up. HiCare is not an emergency service and does not assess or treat medical emergencies or life-threatening conditions. If an emergency or urgent clinical need is identified at any stage, including during the initial needs assessment, the service user will be immediately redirected to the emergency services by calling 999.

SCOPE OF PRACTICE

What you deliver

Who you see: adults aged 18 and over in their own home, whose nursing treatment is prescribed or part of an established treatment plan.

Registered nurses deliver nursing treatment within their NMC registration, verified competence and HiCare's approved scope

Wound care

Dressings and wound management under an agreed treatment plan.

Catheter care

Routine catheter care and maintenance.

IM & SC injections

Intramuscular and subcutaneous injections against a valid prescription or PSD.

IV therapy

Only where clinically indicated and prescribed after an in-person GP assessment.

Medicines administration

Prescribed medicines given within your competence and recorded in HiCare's clinical record.

Continuation of treatment

Continuing an established treatment plan from a HiCare GP, hospital or other provider.

Post-discharge follow-up

Nursing follow-up at home after a hospital stay.

Two limits to note: medicines are given only against a valid prescription or Patient Specific Direction for the named patient, by routes you are assessed as competent in - HiCare does not use Patient Group Directions and nurses do not prescribe for HiCare. HiCare is not an emergency service: emergencies are redirected to 999.

Every visit is offered within your verified scope and the patient's agreed treatment plan

More than a home nursing visit

HiCare connects your visit to the wider care pathway

Referrals from HiCare GPs

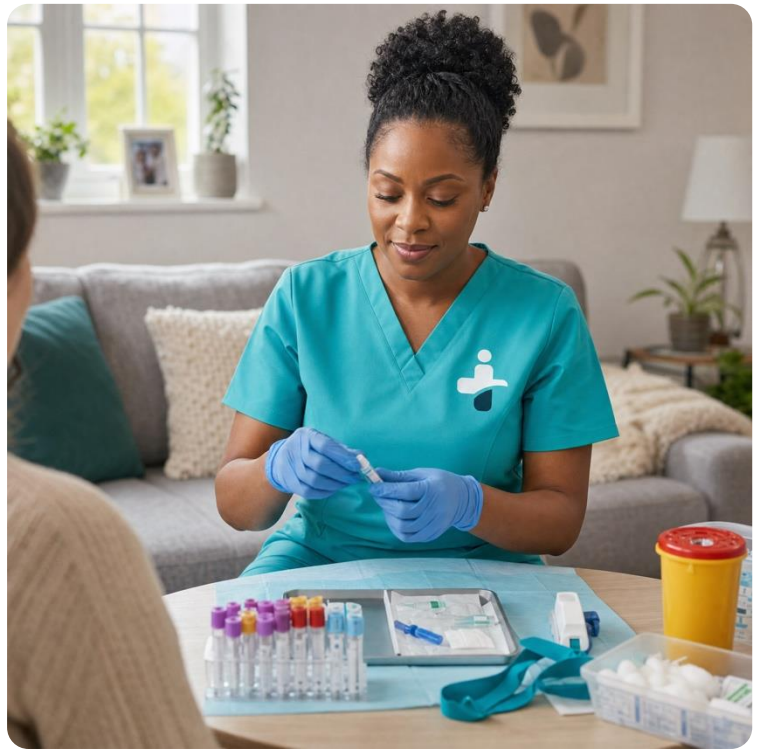

HiCare GPs assess patients at home and can refer them to a HiCare nurse for continuation of treatment, with the prescription or PSD held in the HiCare clinical record.

Medical review when things change

If a patient's condition changes, you escalate through HiCare for a home visit by a HiCare GP, or direct them to their NHS GP, NHS 111 or 999 as appropriate.

Diagnostics and specialist care via GP referral

Blood tests, scans, other diagnostics and specialist appointments are arranged through HiCare GP referral to partner private hospitals and clinics.

This means you can focus on the patient - while HiCare helps coordinate what comes next

You deliver the care. We manage everything around it

HiCare is the healthcare provider

HiCare operates as the healthcare provider and is responsible for the service-level governance and infrastructure, including:

- CQC registration (in progress)
- Clinician onboarding & checks
- Clinical records
- Complaints management
- Safeguarding
- Booking & payments
- Patient support
- Clinical governance & quality

You remain responsible for

Your NMC registration

Professional standards and clinical judgement

Revalidation

Personal tax and NI responsibilities

Your own professional accountability

Professional indemnity: Before your first visit, HiCare verifies that you hold an appropriate indemnity arrangement covering your work for HiCare, as required by the NMC, and re-checks it at each renewal or change in scope.

You remain self-employed and decide when you work

TRANSPARENT EARNINGS

Your income

You set your own fee. For example:

YOU PUBLISH		HICARE SERVICE CHARGE		YOU RECEIVE
£60	–	£12	=	£48
Your own home visit fee		20% standard rate		Paid to you by HiCare

- **The patient sees your published fee as the total price and pays HiCare.**
- **Under the standard arrangement, HiCare retains 20% for the service and infrastructure, and the balance is paid to you.**
- **You never take payment from the patient, issue invoices or chase outstanding fees.**
- **You can change the price of your visits in your account settings any time.**

You set your own fee, so your actual earnings will vary.

EARLY ACCESS · LIMITED TO 100 NURSES

Become a founding HiCare nurse

10% lifetime HiCare fee

The first 100 nurses to join will receive an exclusive 10% lifetime HiCare service charge, with no future increase to this rate.

That means you keep 90% of your published fee rather than 80%.

Be among the first 100 nurses to join the future of healthcare at home

About HiCare

Bringing doctor and nurse visits to the patient's home

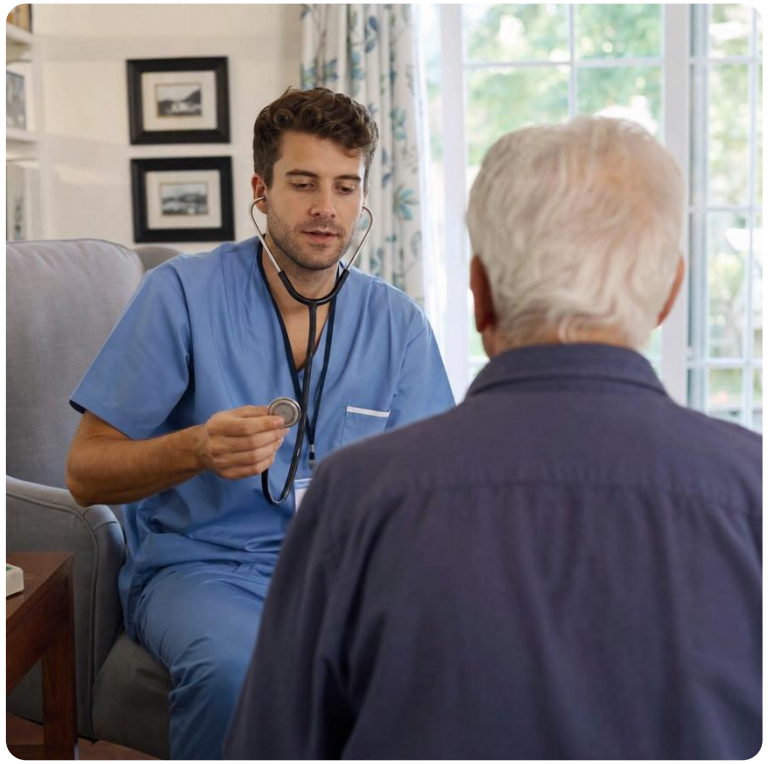

HiCare was founded at Imperial College London in December 2024 by two women founders, Oxana Gorbatenko and Juliana Fernandez.

We are building a new model of person-centred healthcare at home, creating a flexible way for nurses to deliver private care around their existing professional commitments.

Through HiCare, nurses can choose when and where they work, set their own visit fees and receive relevant home visit requests in their preferred areas - an opportunity to build private work and additional income without the complexity of setting up and managing an independent private service.

HiCare manages the infrastructure around each visit - from patient bookings and payments to clinical records, governance and service administration - while nurses retain their clinical independence and professional judgement.

HiCare has applied to the CQC to provide Treatment of disease, disorder or injury through two services: a Mobile Doctors Service and a Community Healthcare Service (registration in progress). HiCare GPs can refer patients to a HiCare nurse for continuation of treatment, and to partner private hospitals and clinics for diagnostics and specialist care.

A simpler way to deliver private nursing care at home - with the flexibility to work around your job and your life
